

# Geographical Restrictions

## Document information

Short title	Geographical Restrictions
Version	V.1.1.1 from 12.09.2025
Classification	Public

The use of the PTV solutions may be subject to special geographical restrictions resulting from applicable foreign laws and regulations:

## 1 Map data for the People's Republic of China

1.1 Among other things, the PTV Solution (PTV Cloud Service or PTV Software Product) may include purchased mapping data for the People's Republic of China. If the government of the People's Republic of China ceases to permit PTV, its suppliers and other service providers to provide this mapping data, regardless of the legal basis, PTV will promptly inform the Customer of this in writing; in this case, PTV is authorised to terminate the Agreement with immediate effect, at the latest at the point at which the provision of the mapping data is discontinued. Regardless of a termination, the discontinuation of the mapping data releases PTV from its related contractual obligations. Any warranty and/or liability claims on the Customer's part and the obligation to release the protective rights of third parties shall not apply in connection with this section. In case of a Subscription or of a time-limited License, the contractually agreed remuneration shall be reduced with effect from the end of usage rights. The reduction is based on the following remuneration models:

- a) For a monthly payment, the remainder of the month in which data ceases to be usable is credited according to the following formula:  
$$\text{number of excess days charged in the month} * \text{cost per day for data according to quotation} = \text{reimbursement}$$
- b) For an annual payment, the remaining months and days for which the data has ceased to be usable are credited according to the following formula:  
$$(\text{number of excess days charged in the month in a proportionate month} * \text{cost per day for data according to quotation}) + (\text{number of excess months charged} * \text{cost per month for data according to quotation}) = \text{reimbursement}$$
- c) If transaction packages are purchased, the unused transactions are credited within the licence period according to the following formula:  
$$\text{price per transaction} * \text{number of unused transactions in the purchased transaction package} = \text{reimbursement}$$

Further claims by the Customer and PTV's liability are excluded.

1.2 When using the PTV Solution, the Customer must strictly adhere to and fulfil the provisions of the Cyber Security Act of the People's Republic of China and the security provisions for computer systems in the People's Republic of China and all other applicable laws and regulations. The Customer shall indemnify and compensate PTV for any infringement of the laws and stipulations of the People's Republic of China for all damages incurred.
